Application Instructions

Cotton, Uncoated Polyester, Fabric blends, Wool, Linen

60° Blade

Cut this material
in mirror image

320°F - 330°F

Firm,
even
pressure

12-15
seconds

Peel warm, use
Teflon Sheet and
repress for 2
seconds

Wash inside out,
wash cool,
tumble dry

No nylon. We do not recommend this as a bottom layer material. PLEASE NOTE: If material starts to separate from the carrier, smooth it back down before cutting.

Instructions for application to moisture-wicking materials:

Damp a cloth with rubbing alcohol (isopropyl alcohol), then gently apply it to the area on the garment you want to apply your design. Allow it to dry and apply your material. This will allow better adhesion to the garment.

Instructions for application to dazzle cloth & shiny polyester materials:

We highly recommend that you TEST prior to doing large runs. Coated polyester can routinely cause adhesion issues.
