

# Specialty Digital Film

## Digital Print Frosted Etch Film

SD1048118

Tape Technologies 4mil specialty digital frosted etch calendered vinyl film is coated with a permanent acrylic pressure sensitive adhesive, laminated to a 78 lb clay coated liner. This film is designed to accept a variety of solvent and eco-solvent based inkjet and UV curable inks common to wide format digital printing systems. Adhesive produces permanent bond to a variety of common substrates used in the graphics industry.

|                       |                                                                                                |
|-----------------------|------------------------------------------------------------------------------------------------|
| <b>Application</b>    | Designed for interior or exterior signage, decals, nameplates, and point-of-purchase displays. |
| <b>Film Thickness</b> | Monomeric PVC calendered<br>4.0 mil +/- 5%                                                     |
| <b>Adhesive</b>       | Clear acrylic permanent                                                                        |
| <b>Adhesion</b>       | 45 oz/in +/- 5% to stainless steel PSTC-101                                                    |
| <b>Liner</b>          | 78 lb clay coated                                                                              |
| <b>Durability</b>     | Up to 3 years                                                                                  |
| <b>Shelf Life</b>     | 1 year when stored at 70° F and 50% relative humidity                                          |
